

GOT RUST?

NEW CO-POLYMER TECHNOLOGY SOLVES YOUR RUST PROBLEMS!

THE HARD WAY

Without **BLACK-MAX™**, you have to get rid of **rust** the hard way, by sandblasting equipment and facilities!

THE EASY WAY

With **BLACK-MAX™**, you get rid of **rust** the easy way! New **BLACK-MAX™** is guaranteed to work, easy to apply and absolutely stops **rust** dead in its tracks. No matter where you've got **rust**, you need **BLACK-MAX™**!

Today, **rust** is everywhere in Public Works Departments! **Street, Water, Wastewater, Highway, Bridge, and Utilities Departments** take great pride in their equipment and facilities, but **rust** is a natural and costly enemy!

Frequent and expensive repainting only temporarily improves the appearance of a **rusty** surface, because **rust** quickly bleeds back through your new paint! Sandblasting has always been the **S.O.P.** to remove **rust**. However, sandblasting is quickly becoming unacceptable as containment of blast residue is a huge environmental concern, plus the sand is extremely damaging to the bearings of your equipment.

Thus, **RHOMAR** developed **BLACK-MAX™**, an effective and environmentally responsible alternative to sandblasting and frequent repainting of any **rusty** surface. **BLACK-MAX™** is remarkable for treating a painted surface that has **rust** bleed-through, protecting a **rusty** bare metal surface from the elements or preparing a **rusty** surface for painting.

Stop **rust** in its tracks with proven **BLACK-MAX™** and enjoy the following benefits:

- ✓ **HALTS** - existing rust activity!
- ✓ **PREVENTS** - cathodic rust activity by blocking oxygen!
- ✓ **STOPS** -rust bleed-through of paint!
- ✓ **REDUCES** - containment of sandblast residue and bearing failure!
- ✓ **VERSATILE** - on all metals found in Public Works Departments!
- ✓ **TRANSFORMS RUST** - into a black polymer shield. Simply brush, spray or roll on **BLACK-MAX™**, it's that easy!

Simply the best solution for **rust**! You've got to try **BLACK-MAX™** to believe it!

More information about **BLACK-MAX™**

Repainting is expensive! New **BLACK-MAX™** prevents rust bleed-through of new paint by encapsulating rust with a polymer shield, so no more repainting!

NEW CO-POLYMER TECHNOLOGY SOLVES YOUR RUST PROBLEMS!

Every Public Works Department needs proven **BLACK-MAX™** to combat rust:

Street Departments:

Rust on your truck beds, frames, salt spreaders, sign posts and construction equipment.

Bridge Departments:

Rust on rocker arms, bearings, cables and railings.

Water Departments:

Rust on hydrants, pipes, chlorine equipment and well houses.

Sewer Departments:

Rust on storm basins, collection boxes, lift stations and manhole covers.

Wastewater Departments:

Rust on storage tanks, clarifiers and plants.

Utility Departments:

Rust on distribution pipes, transformers and metal enclosures.

Park & Rec Departments:

Rust on playground equipment, restrooms, fencing and mower decks.

Agricultural Enterprises:

Rust on fertilizer equipment, spreaders, discs and harvesting implements

HALTS EXISTING RUST

PREVENTS FUTURE RUST

REDUCES NEED FOR SANDBLASTING

EASY TO APPLY

Customer comments about **BLACK-MAX™**:

I was looking for a good solution to protect my vehicle undercarriages from rust and corrosion, and I found it with BLACK-MAX. Since starting to use BLACK-MAX in early 2001 we have virtually eliminated the need for sandblasting.

R.K.
Wyoming DOT

My biggest frustration is that rust always comes back through the new paint. We always seem to be repainting the same areas. I wanted to say thank you because BLACK-MAX really works! We are no longer repainting the areas that we first treated with BLACK-MAX.

J.G.
WWTP

BLACK-MAX™ is remarkable at stopping rust and corrosion from chlorine usage in water and wastewater plants.

Bridge Departments absolutely love new **BLACK-MAX™** because it stops the rust on rocker arms!

BLACK-MAX™ extends the operational life of your expensive salt spreaders! Don't let your salt spreader die young, use **BLACK-MAX™**!
